Profile Summary

- A full stack developer with high **problem-solving skills** and develops **complex projects**.
- I have proficiency in **IoT Devices** and built projects which can be used by a widespread of people.
- **Developed a highly scalable attendance system** which is used regularly in our college.
- Working professionals **achieved Posture improvement** with help of my **Smart Chair**.
- Identified the visual inaccuracies in the existing college website and **improved** the UI.
- Possesses **in-depth knowledge of multiple technology stacks** which in turn contributes to an efficient development stage of products.

Academic Projects

Slouch Detection System

June 2022 – March 2024

Tools: React, Django, Docker, Arduino Programming

A Smart Chair which helps the user to avoid bad posture by sending an alert on desktop and a dashboard to show the improper posture.

Responsibilities:

- Designed the hardware for this system, and programmed it using Arduino IDE.
- Designed and Developed the Dashboard in React, where the user will get an alert for improper posture.
- Developed the backend of this system, which will take the data from sensors over web socket and send it to the neural network to check the posture of the user.
- Deployed the entire architecture over Docker Compose and Nginx on a self-hosted cloud (Raspberry Pi 4).
- <-Add-source-code->, <-Add-Live-Link->

Smart Home System

June 2022 – March 2024

Tools: React, Node, Docker, Arduino Programming

A device which sits inside a conventional switch board and makes normal appliance – Smart using IoT protocols.

Responsibilities:

- Designed and implemented the Web App for toggling lights, fans, AC, TV over web.
- Developed the backend in Node to send the API requests to IoT devices over MQTT protocol.
- Integrated voice assistants like Google Home, Alexa, Siri in the backend to make the appliances voice activated.
- Deployed the entire architecture over Docker Compose on Amazon EC2 Instance.
- <-Add-source-code->, <-Add-Live-Link->

Academic Achievements

- Implemented a biometric attendance tracker system for college to track and export attendance of students in CSV format.
- Improved the UI of college website to include a separate page for Alumni and Teachers.
- Writing a Research paper for Slouch Detection System and planning to publish in the later half of this year.
- <-Add-significant-achievements->

Academic Details

- **Bachelor of Science (B.sc) in Computer Science**
- Balbhim arts,science and commerce college, Beed;
- Percentage : 78.06
- SGPA: 8.43

Soft Skills

Analytical | Collaborator | Leader | Adaptable

Technical Skills

- **Programming Languages:**
- Html,Css,JavaScript,java,c++
- **Frameworks:**
- React, Angular,Bootstrap

Core Competencies

Agile Methodologies

Software Development Life Cycle

Restful API

Debugging

Containerization

Web Services

Microservice Design

Performance Optimization

System Scalability

Personal Details

Date of Birth: 1th Feb 2005

Languages Known: English, Hindi and Marathi

Address: Patoda,beed, Maharashtra
